Participation to the test will not be allowed without the complete avalanche and safety equipment.

Introductory meeting: All accepted candidates will be informed of the place and time of the introductory meeting.

Test structure: The Safety Test shall be composed of two parts including five compulsory modules, each of which is subject to individual evaluation. The Safety Test shall assess the safety-related knowledge and skills of the candidates by means of a theoretical exam and a practical exam. If a candidate fails one or more of these modules or if the Safety Test does not include all of the modules, they must re-sit the test in its entirety. The content of the various modules is set out below.

The theoretical exam

Make an emergency call in the language of the host country to the local rescue services after an avalanche accident'. The theoretical exam shall be successfully completed, where the emergency call has been made to rescue services in a clear and comprehensible manner and by providing accurate information enabling them to perform their duties.

The practical exam

The practical exam for off-piste skiing consists of three teaching modules focusing on group leadership and a module comprising the search for and rescue of two persons buried under an avalanche. The practical exam must be taken in one of the official languages of the Member State where the test takes place. The three modules on group leadership shall each last 15 minutes in addition to 15 minutes preparation time. These teaching modules shall be successfully completed, where at least 75 % of the exercises have been performed satisfactorily.

Complete information about the test can be found in the DELEGATED COMMISSION REGULATION (EU) 2019/907 (https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=uriserv:OJ.L_.2019.145.01.0007.01.ENG)
